LILIES FOR FAIR
LADIES ON EASTER
The lily, they say, is the emblem of purity. So is the American woman, as a rule. The two go together. Our lilies, cut or in growing plants, are emblematic of nature's greatest charm. Graceful, pretty to look upon, snow-white—they will grace any lady's boudoir or living room. Order some from us today.

\$125,000 FOR SWAT KING IS RECORD

A new baseball star has flashed across the horizon, eclipsing the publicity which the great Ty Cobb has dominated so long. It is Babe Ruth, home run hitting king, pitcher-outfielder, who has just been sold by the Boston Americans to the New York Americans for \$125,000—the record price of all time in baseball deals.

Other projects for the development of water power are also being considered by private persons and corporations. An official commission has prepared a plan for the irrigation of a 37,000-acre tract not far from Montevideo, to serve as an experiment and example. "Up to the present time," says the report, "nothing has been done in Uruguay in the way of taking advantage of the country's water-courses for irrigation and power."

Fifteen cities of Uruguay are also to install water and sewerage plants within the next few years, says Trade Commissioner W. W. Ewing, who writes the report. The pre-war estimates for this work totaled about \$15,000,000. In 1916, American engineers contracted for the installation of water and sewerage systems in three of the largest cities in Uruguay at a cost of \$5,000,000. The work was completed 12 months before the contract date and the bonds have now been retired by the Uruguayan government. It is probable that a part of the new work of this nature will be given to American interests.

There is a present need in Montevideo for a large number of workmen's houses, for at least 16 new business structures, a hotel, an opera house, cold storage facilities, and a number of factories, the total cost of immediate needs in private construction of these kinds being estimated by architects at \$16,300,000. Within the next few years the government will need new and modern edifices to the value of \$23,000,000. The chief imports which this program of construction will require are steel and finishing materials.

Uruguay has local supplies of granite, marble, porphyry, limestone in limited quantities, and cement. There is also abundance of excellent clay for brick-making, but it has not been fully utilized. No clay roofing tiles or sewer pipe are made in Uruguay. All fire bricks and plaster of Paris are also imported. There is a developing demand for many types of construction tools and machinery, and for heating and elevator installations, according to this report, which is known as special agents series No. 189, "Construction Materials and Machinery in Uruguay," and is sold at the nominal price of 15 cents by the superintendent of documents, government printing office, Washington, D. C. The report may also be obtained at any of the district or co-operative offices of the bureau of foreign and domestic commerce.

BIG COAL BEDS

WINNIPEG, Man., Apr. 2.—Bituminous coal deposits totalling nearly 30 million tons, and lying within three feet of the earth's surface so that it may be loaded on cars as cheaply as gravel can be loaded in a ballast pit, have been located near Jasper Park, according to George E. McDonald, general manager of the Pacific Great Eastern railway, who was recently in the prairie provinces.

NEW SOLDIER LAND

VANCOUVER, B. C., Apr. 2.—Announcement is made that the Kettle Valley railway will next year build a branch from Penticton, B. C., south to the international boundary—35 miles, thus opening a great tract of irrigated land, which will contain the largest soldier settlement area in British Columbia. The land will be devoted to fruit-growing.

NOTICE

Carpenters' local No. 190 meets every Wednesday evening in the Labor hall, 6th and Main.
